

# Rajiv Kulkarni, A Problem Solver

 Available

As a self taught developer and a highly neurodivergent human being, I highly value the ability to bring a client’s vision to life, which is very rewarding. There is a huge amount of satisfaction I gain from seeing a piece of work from idea to design, to being an actual product especially when it appears in the user hands. I believe the user-centered solutions are the most valuable future digital resources.

## Professional experience // WKDY Hustle

Dec 2018 - May 2019

Technical Content Writing (Internship) 

 **Candid.Technology** Tech Journalism in India

Worked as a technical content writer for a famous tech journalism company in Delhi, India. Wrote over 50 articles each one comprising of at least 1200 words. Worked on a wide range of topics from consumer tech, Android, iOS, Cryptos, Gaming, Tutorials, Coding, Software's, Reviews, etc.

July 2021 - Present

Integration Analyst 

 **Zocdoc Inc** Online healthcare solutions in New York, USA

- Developed a complex Working Hours Retool app to manage the working hours of healthcare professionals. The tool integrated multiple layers, from data flow to API calls, and utilized a significant amount of JavaScript queries to manage logic across different components.
- Created an application to provide comprehensive data on supervisors and workers for synchronizer/calendar integration technology, including bulk set-up auditing of doctor’s on our platform. This tool was crucial making sure our integrations are at their topmost performance and capabilities.
- Building micro-services and deploying custom built for our platform which helps integrate over 150+ EHRs across the USA.

## Personal experience & projects // WKND Hustle’s

Dec 2022 - Present
